NextGen Boiler Factory Number

The NextGen Boiler serial number is referred to as the factory number.

The marking plate is located on the following locations.

- Both ends of the shipping box
- Inside the boiler near the bottom of heat exchanger
- Lower right corner of the boiler

Factory code (serial number) Explanation

- L - Product group
- U - Model
- U - Power supply type
- 12 - kW power output
- US - Country code
- 01 - Design number, revised when there is an important update
- S - Coded year 2015
- 00041 - Sequence number

Sequence number is reset at the beginning of January each year. In 2016 (T) the factory number will look similar to this: LUU12US01TXXXX.

Series number

The series number is the date of manufacturing. The series number is located on labels on each end of packaging box. Example 09-week; 15-year; 02-month; 23-day. The date code is also on each marking plate.
